

# **Core Contractor Meeting**

## **October 25 – Pomeroy Hotel, Fort St John**

Agenda

# Core Contractor Meeting Agenda

## October 25, 2011

\*\*\*\*Please provide incidents to be presented before 9am.

Please note all times are local BC.

- 09:00 Introductions
- 09:15 LOPC's Prevention (If we can have you bring to the table what your company has done to prevent Loss of Primary Containment)
- 09:45 PAUSE Review: In order to enhance hazard recognition awareness and understanding among staff and contractors and move ourselves more successfully toward Goal Zero, Heavy Oil will implement Worksite Hazard Management (WHM), also known as "Pause" training, across its sites. This training review aims to help workers conduct real time hazard assessments and put robust controls in place to safely complete their tasks. The program highlights the importance of team work and interventions and involves the use of skilled coaches to help you apply what you have learned. There are many cited examples of where "Pause" processes have helped prevent incidents and my strong belief is that focused programs like this will enhance our systems and translate into sustainable Goal Zero performance.
- 10:45 LFI (Learning from Incidents)
- 11:00 Working at Heights –  
Shell -Darwin Storms LSR mini campaign and OCA Documentation
